15,000+ cycles*

We don't just make promises, we deliver results — year after year, cycle after cycle. Encore semi-professional washers and dryers are built with commercial components and **last nearly three times longer** than residential models and top load washers.

*Note: that's tested at full load capacity!

Time-of-day promo pricing

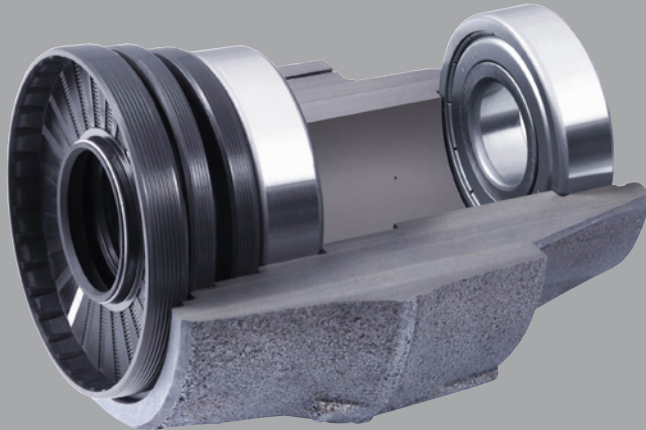

Encore washers are easily programmable with **promotional vend pricing** at specified times and days. A number of promotion events can be programmed at one time using the built-in real time clock. This allows owners to automatically run discounts to boost profits during slow periods.

Adjustable water levels and custom programs

The field **adjustable water levels** give owners complete control over the machine so it can adapt to a variety of load sizes and types. **Custom programs** can easily be set to meet your specific market demands. You can modify parameters including rinse, prewash, wash time, extraction speed, and more.

Heavy duty SKF bearings

Encore washers are built with **two commercial grade SKF bearings**. These premium bearings are sealed for maximum protection leading to longer life with fewer repairs. The three individual seals with 5 lips provide a water-tight barrier around the drive shaft to protect the bearings from damaging moisture. To ensure better performance, the durable AC motor has no brushes.

8-point suspension and solid steel counterweights

The robust **8-point, heavy duty suspension system** features advanced technology to keep loads in balance, eliminate oversuds, and finish the cycle. The premium counterweights are constructed of solid steel — no concrete — providing additional strength and enhancing the longevity of the machine.

Soft-mount for easy installation

Encore's unique suspension system provides higher spin speeds and allows for **easy installation** in a variety of situations. No concrete foundations or bolts necessary. The standard 27-inch width makes it easy to replace existing front and top load washers.

Option buttons for higher revenue

Higher revenue can be earned with **flexible program pricing** and **two cycle option buttons**. You can set your wash cycles at any price you want, not just in quarter increments. Plus the option buttons give your customers control over their laundry and cleaning results. Users can choose the Heavy Soil and/or Extra Rinse options for an additional upcharge.
